

quinn

A vertical social network founded
by IIT Delhi and Microsoft alums

Assignment details

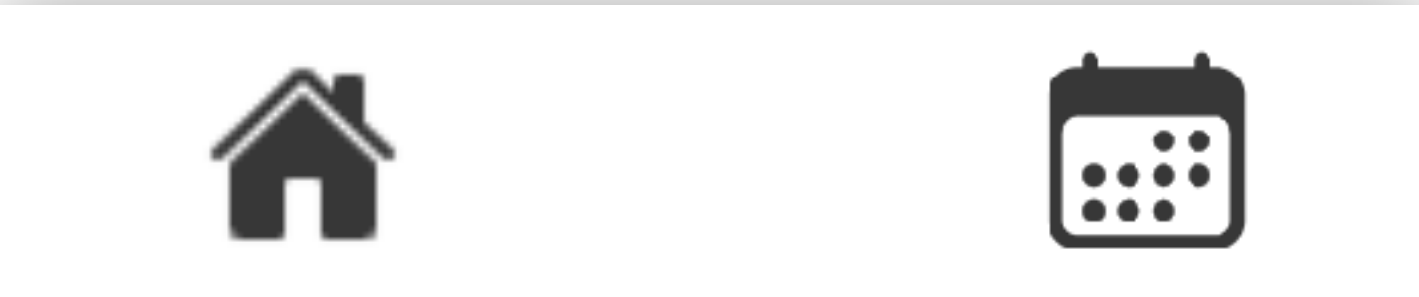

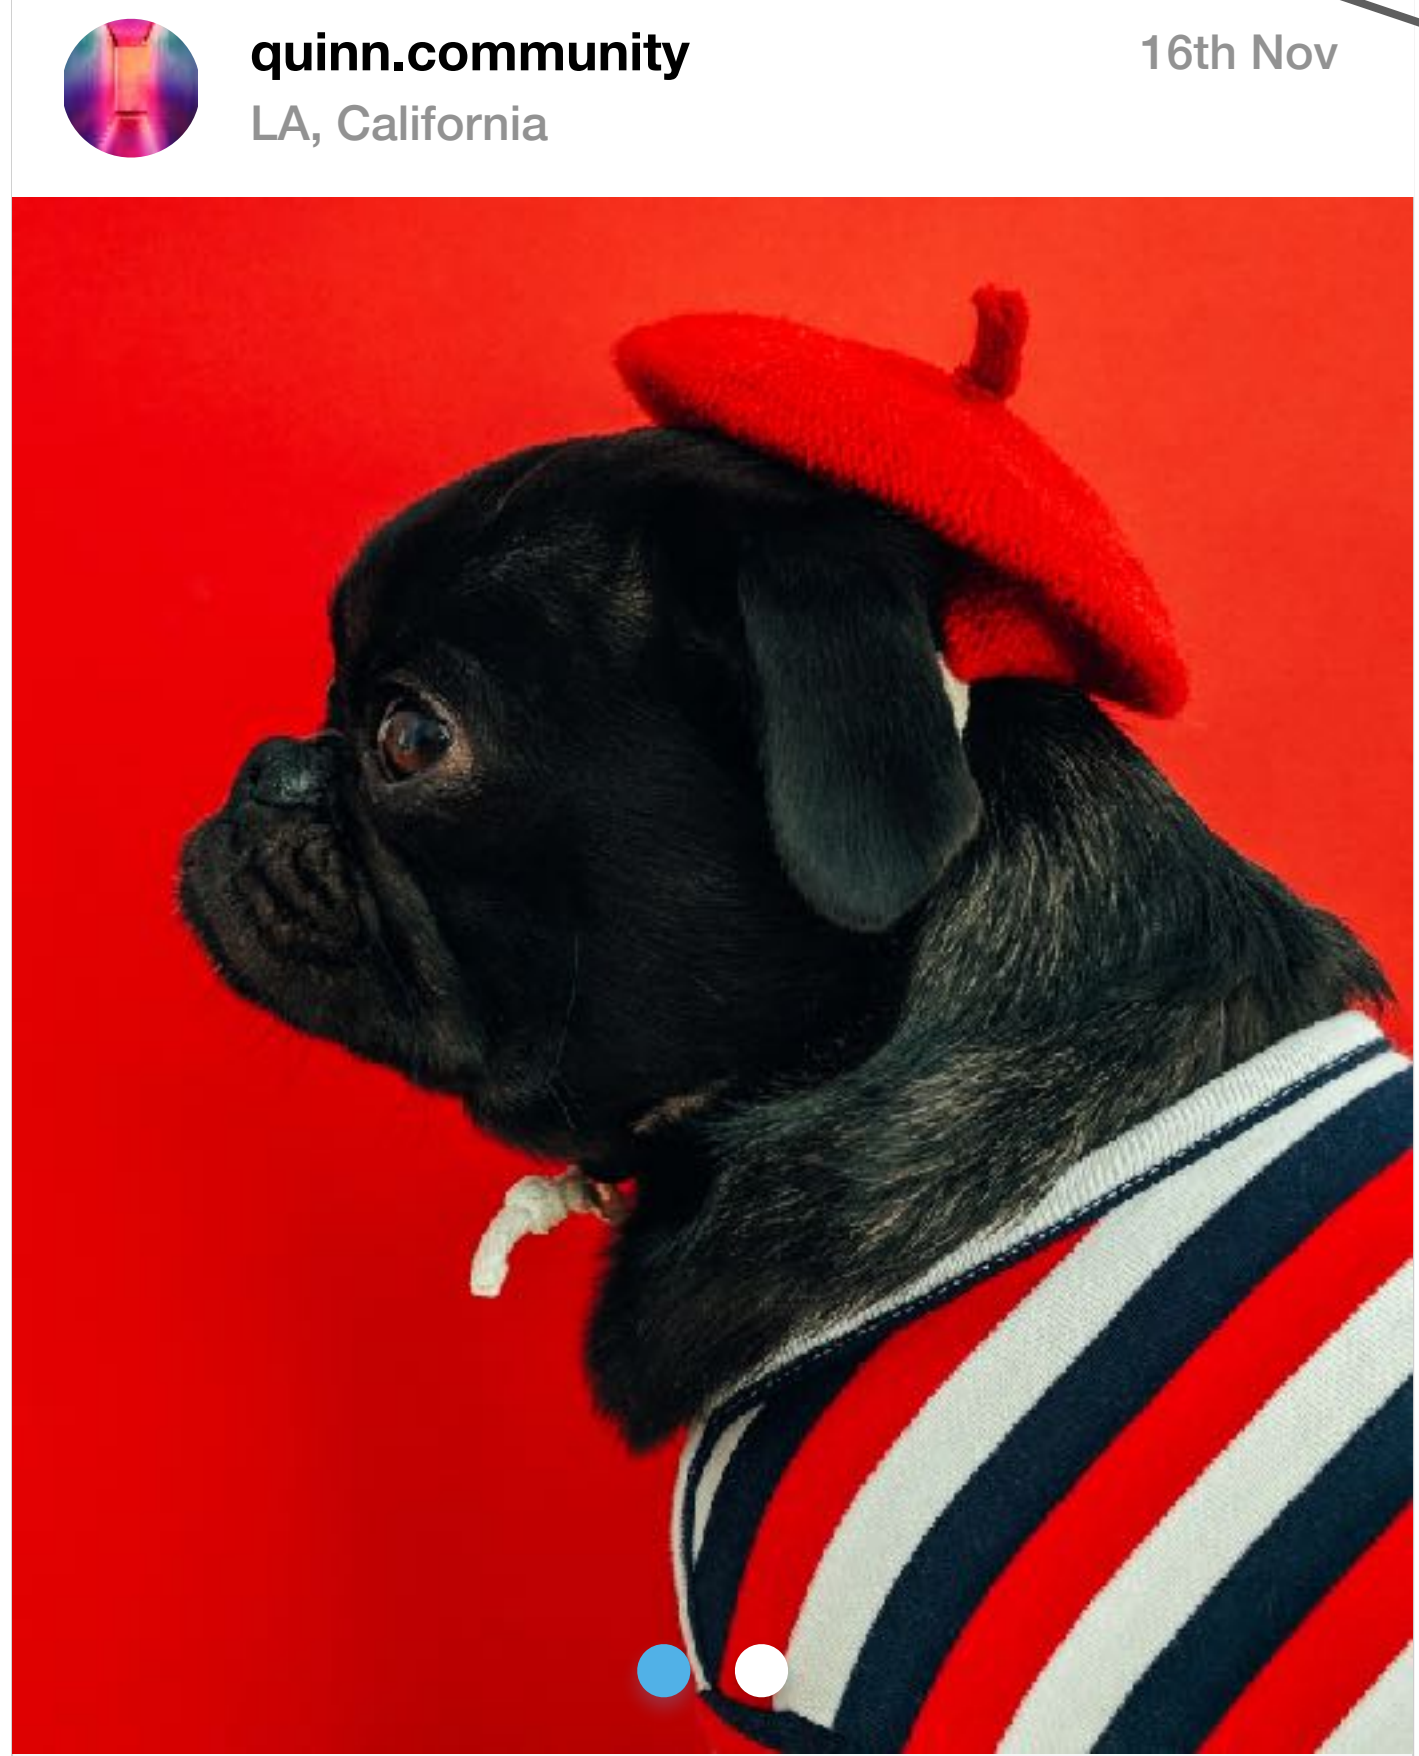

- An Instagram like feed
- A calendar view of the same

Please use either:-

- a) React-Native (preferable)
- b) ReactJS

as the frontend framework

More details ahead >>

Feed Page

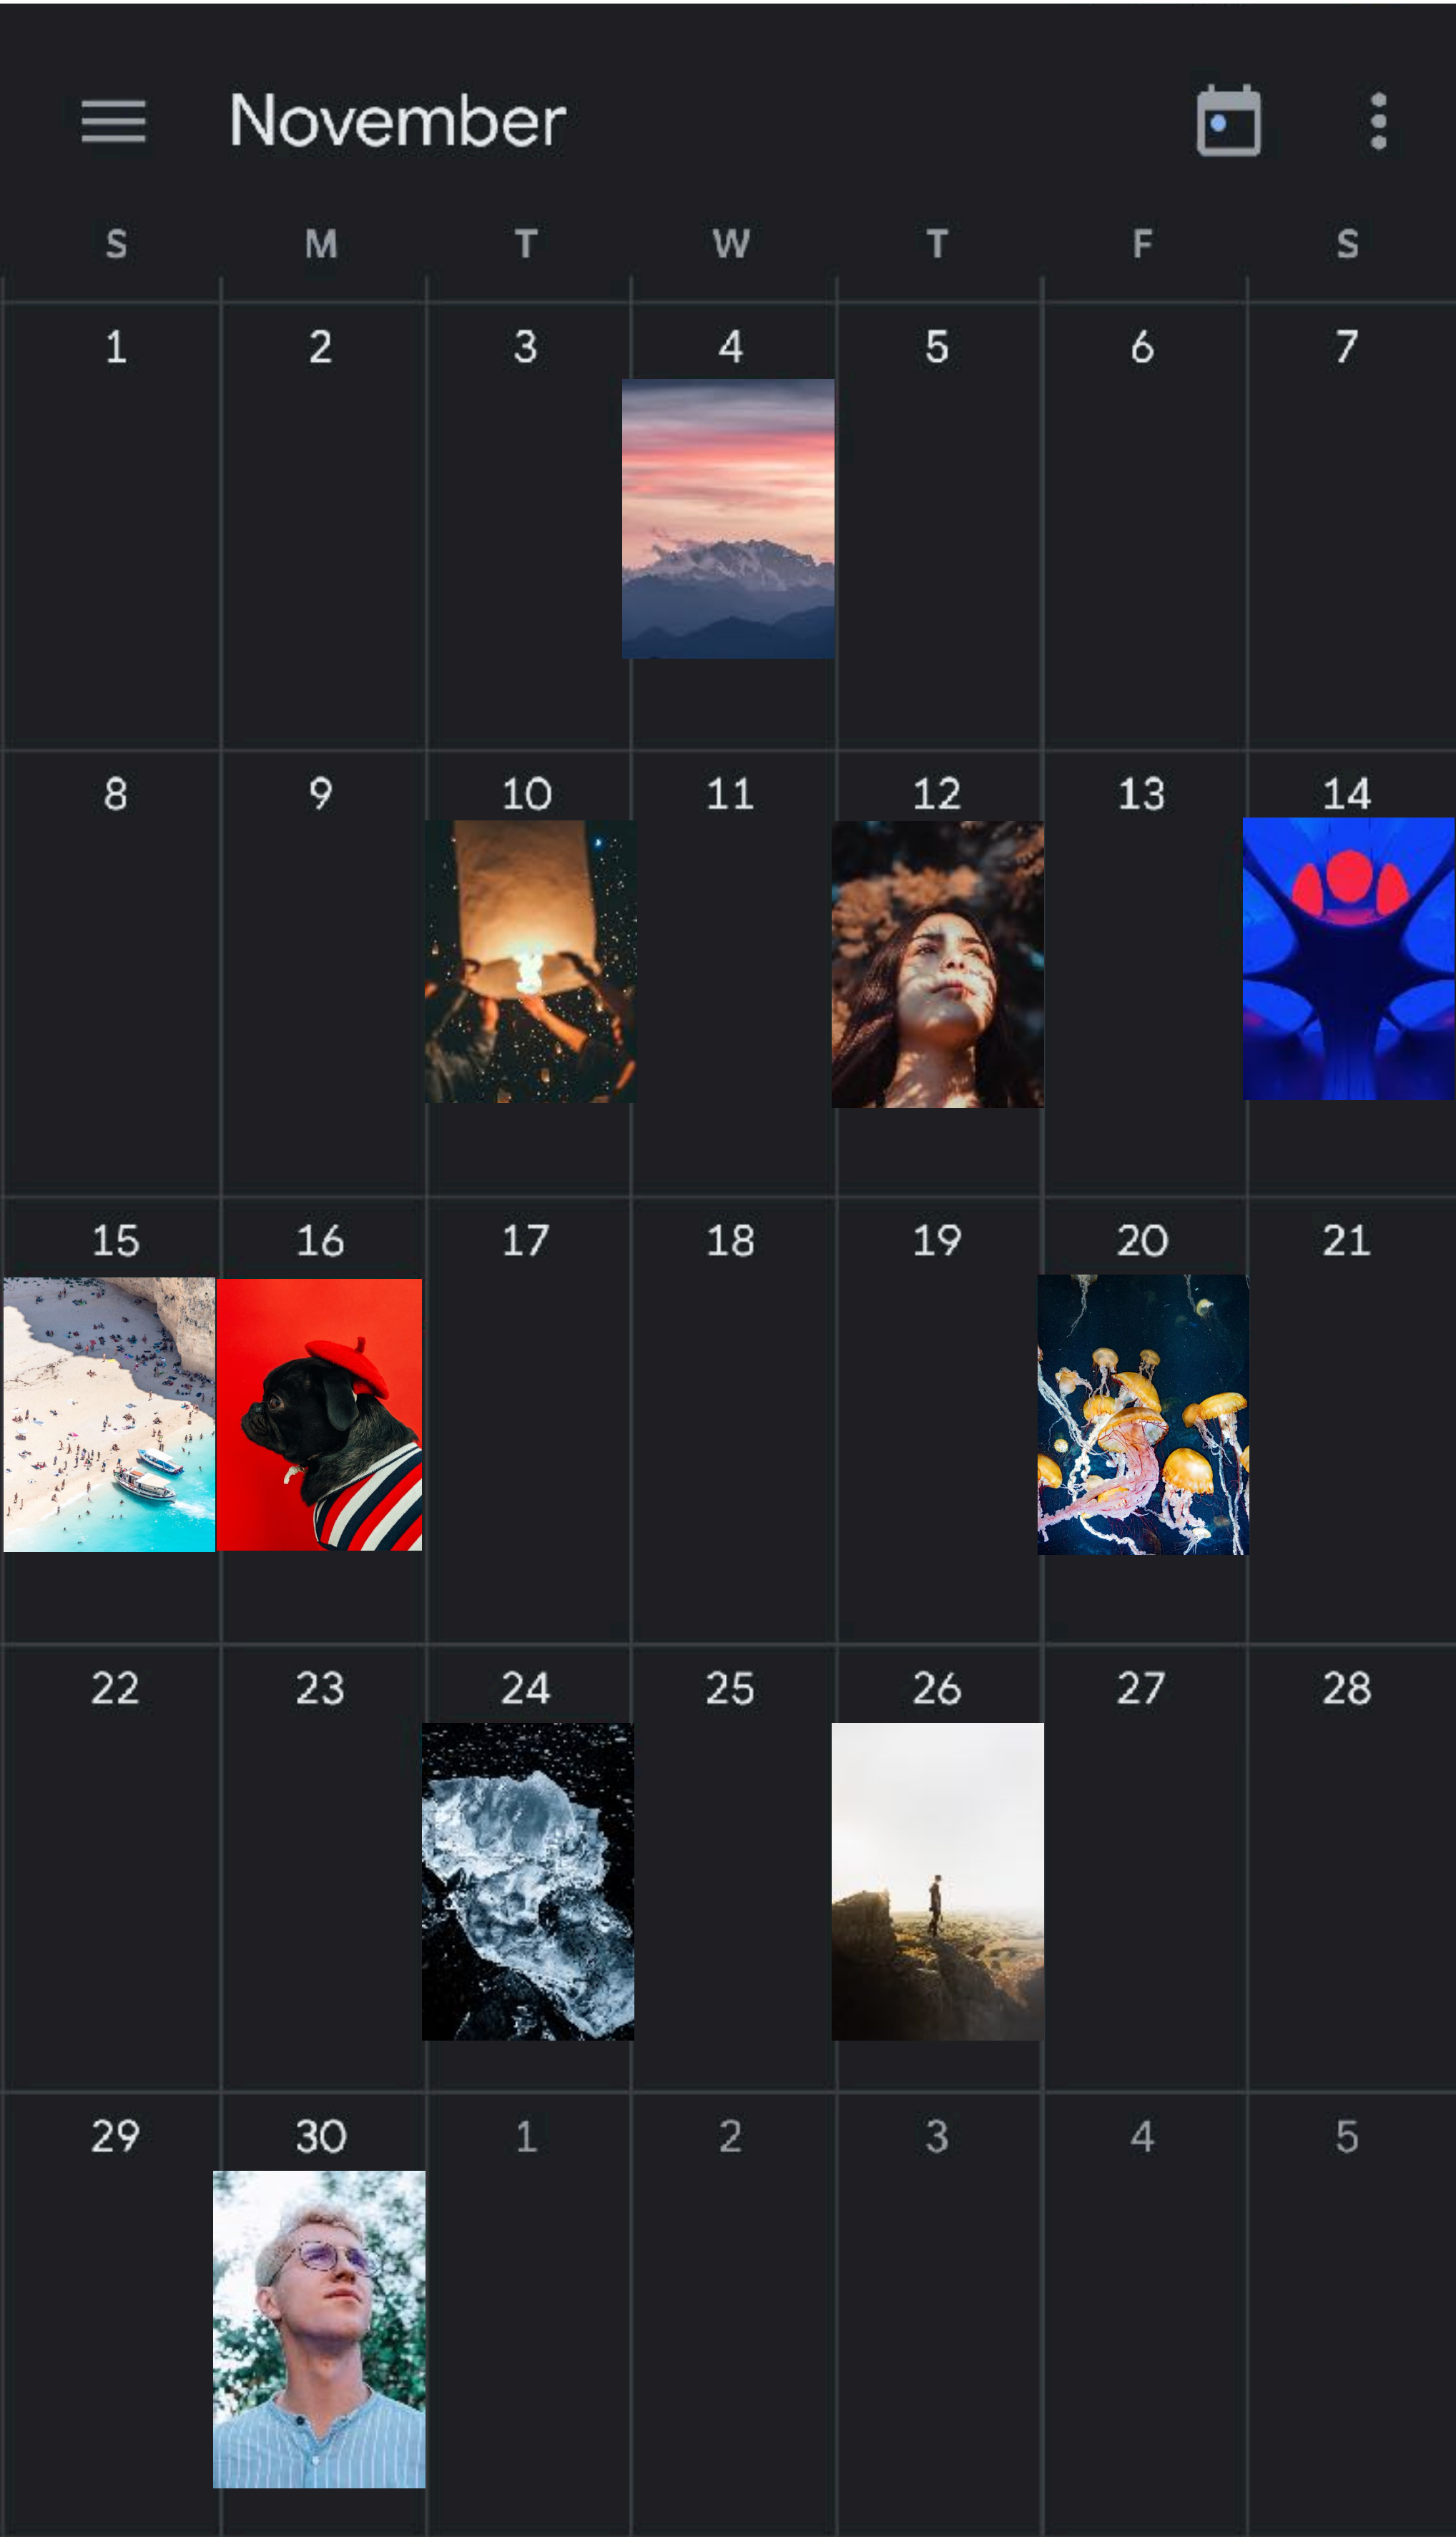

Pretty similar to Instagram's feed.

Page size not in proportion -> elongated at the moment

Each card supports multiple images

Date, user info, location, etc

Tabs: Feed & Calendar

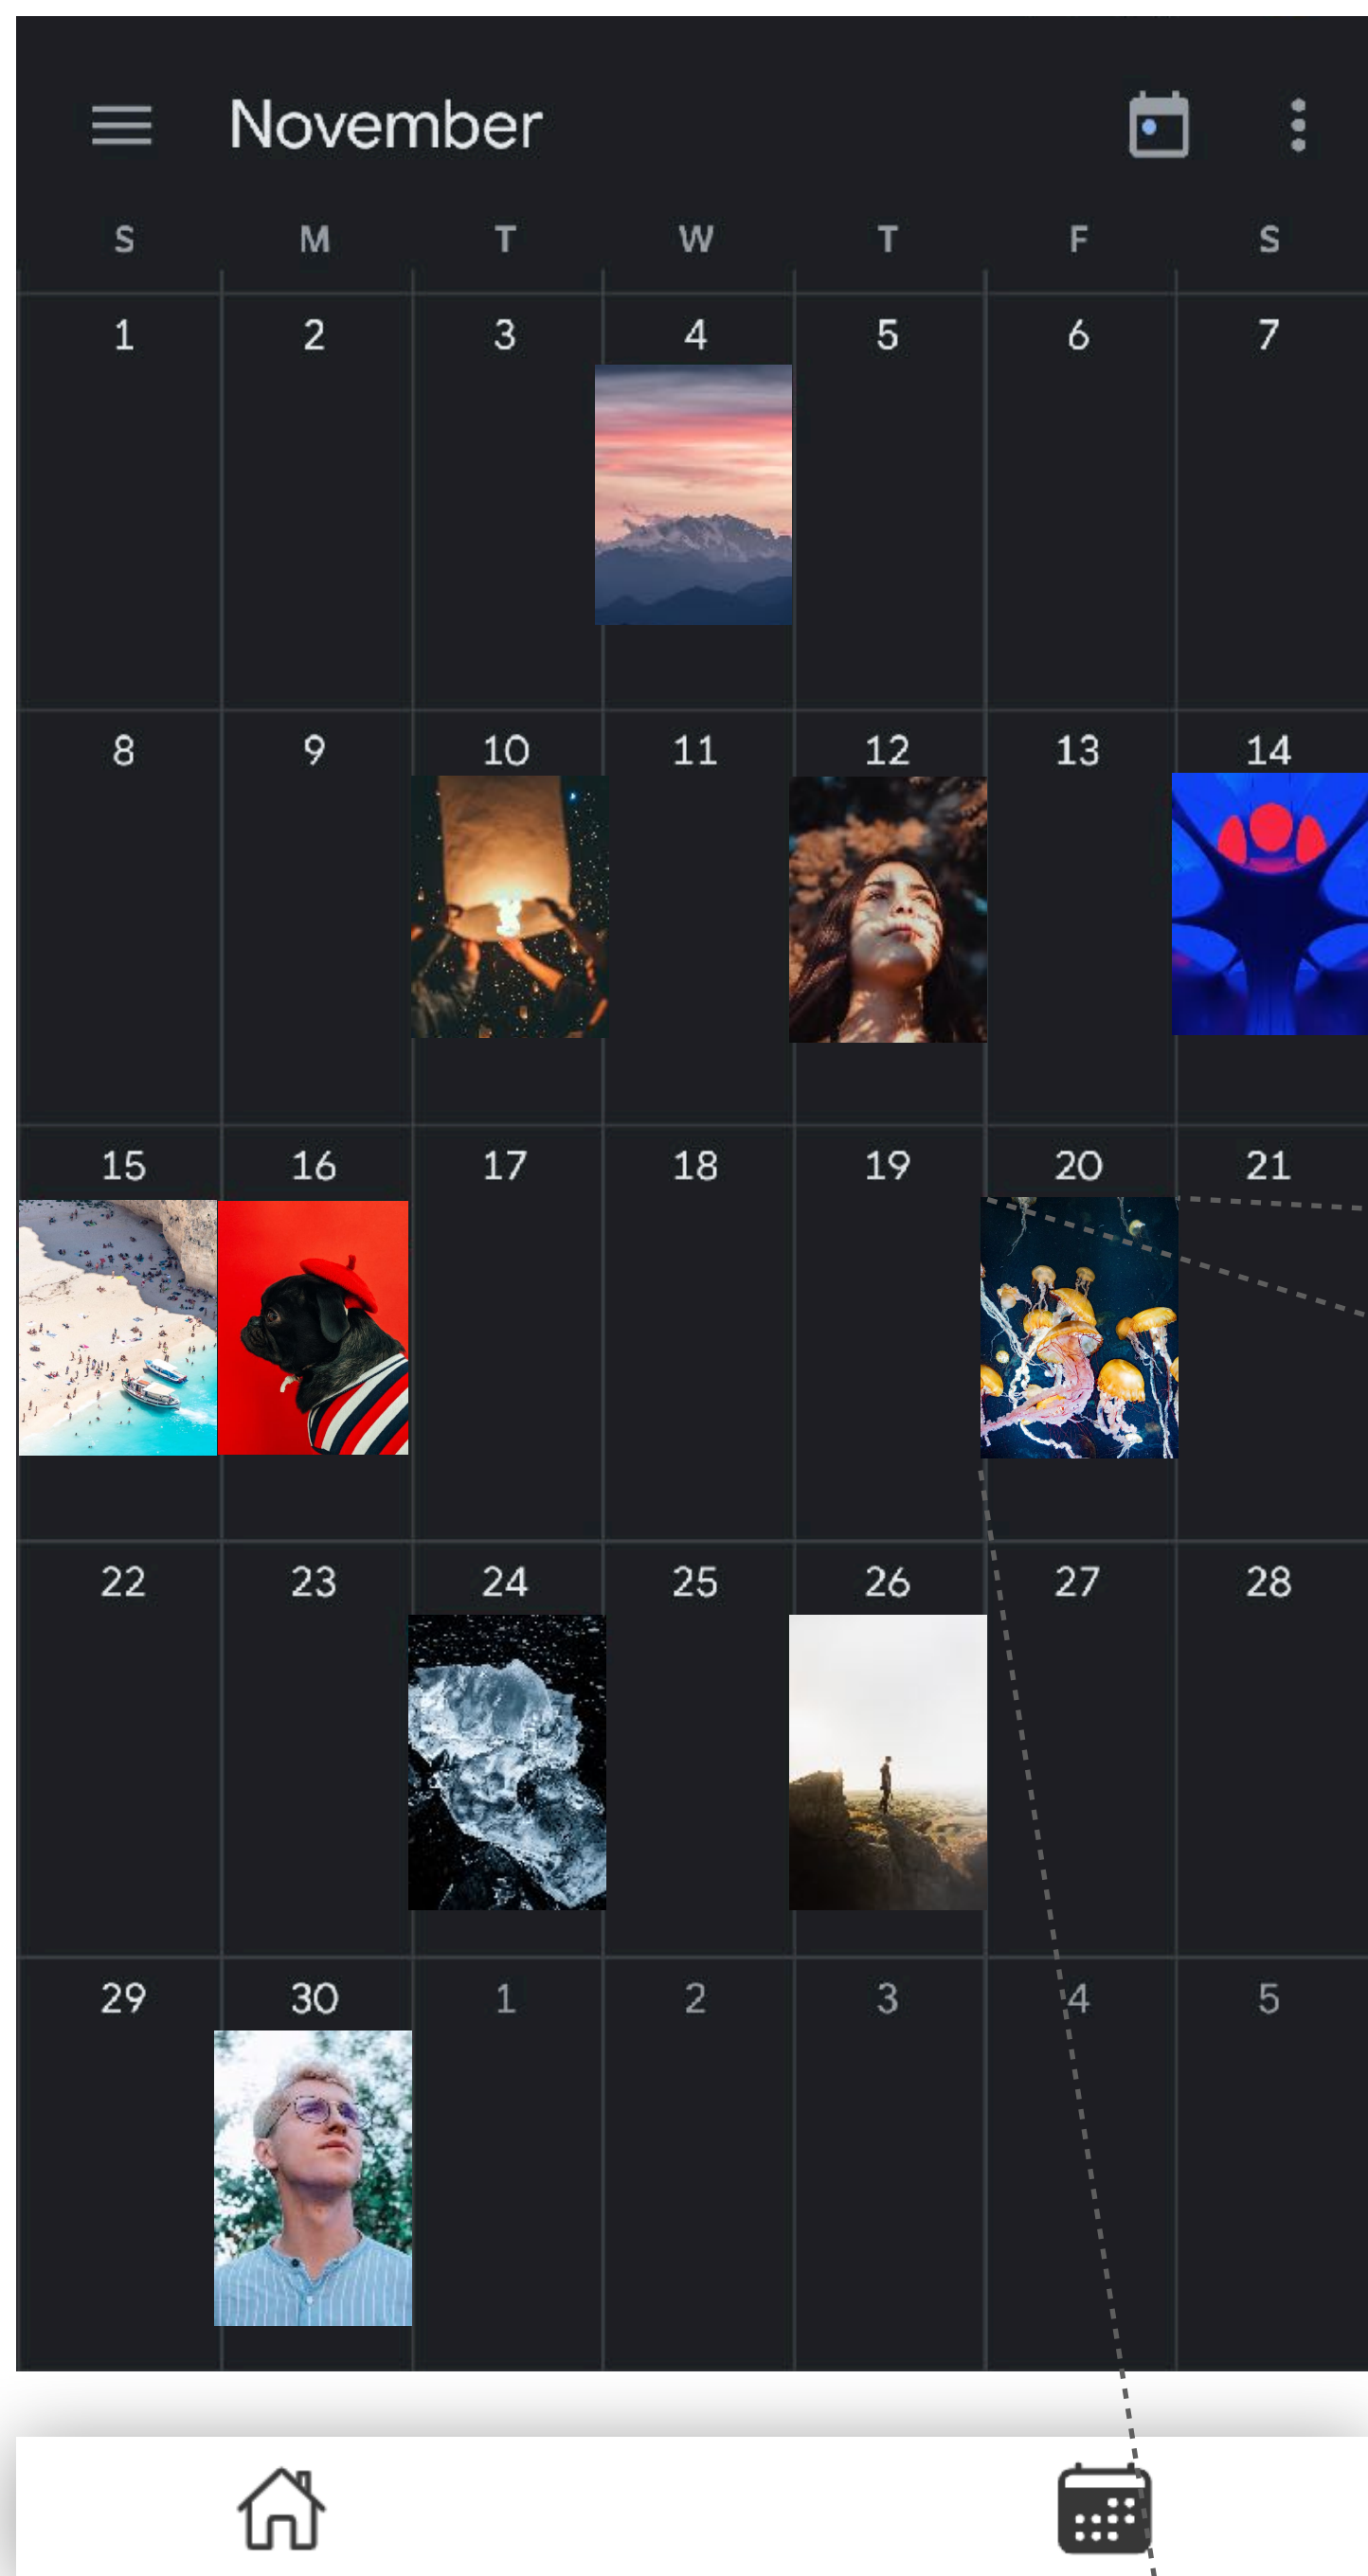

Calendar Page

Each date entry has a thumbnail.

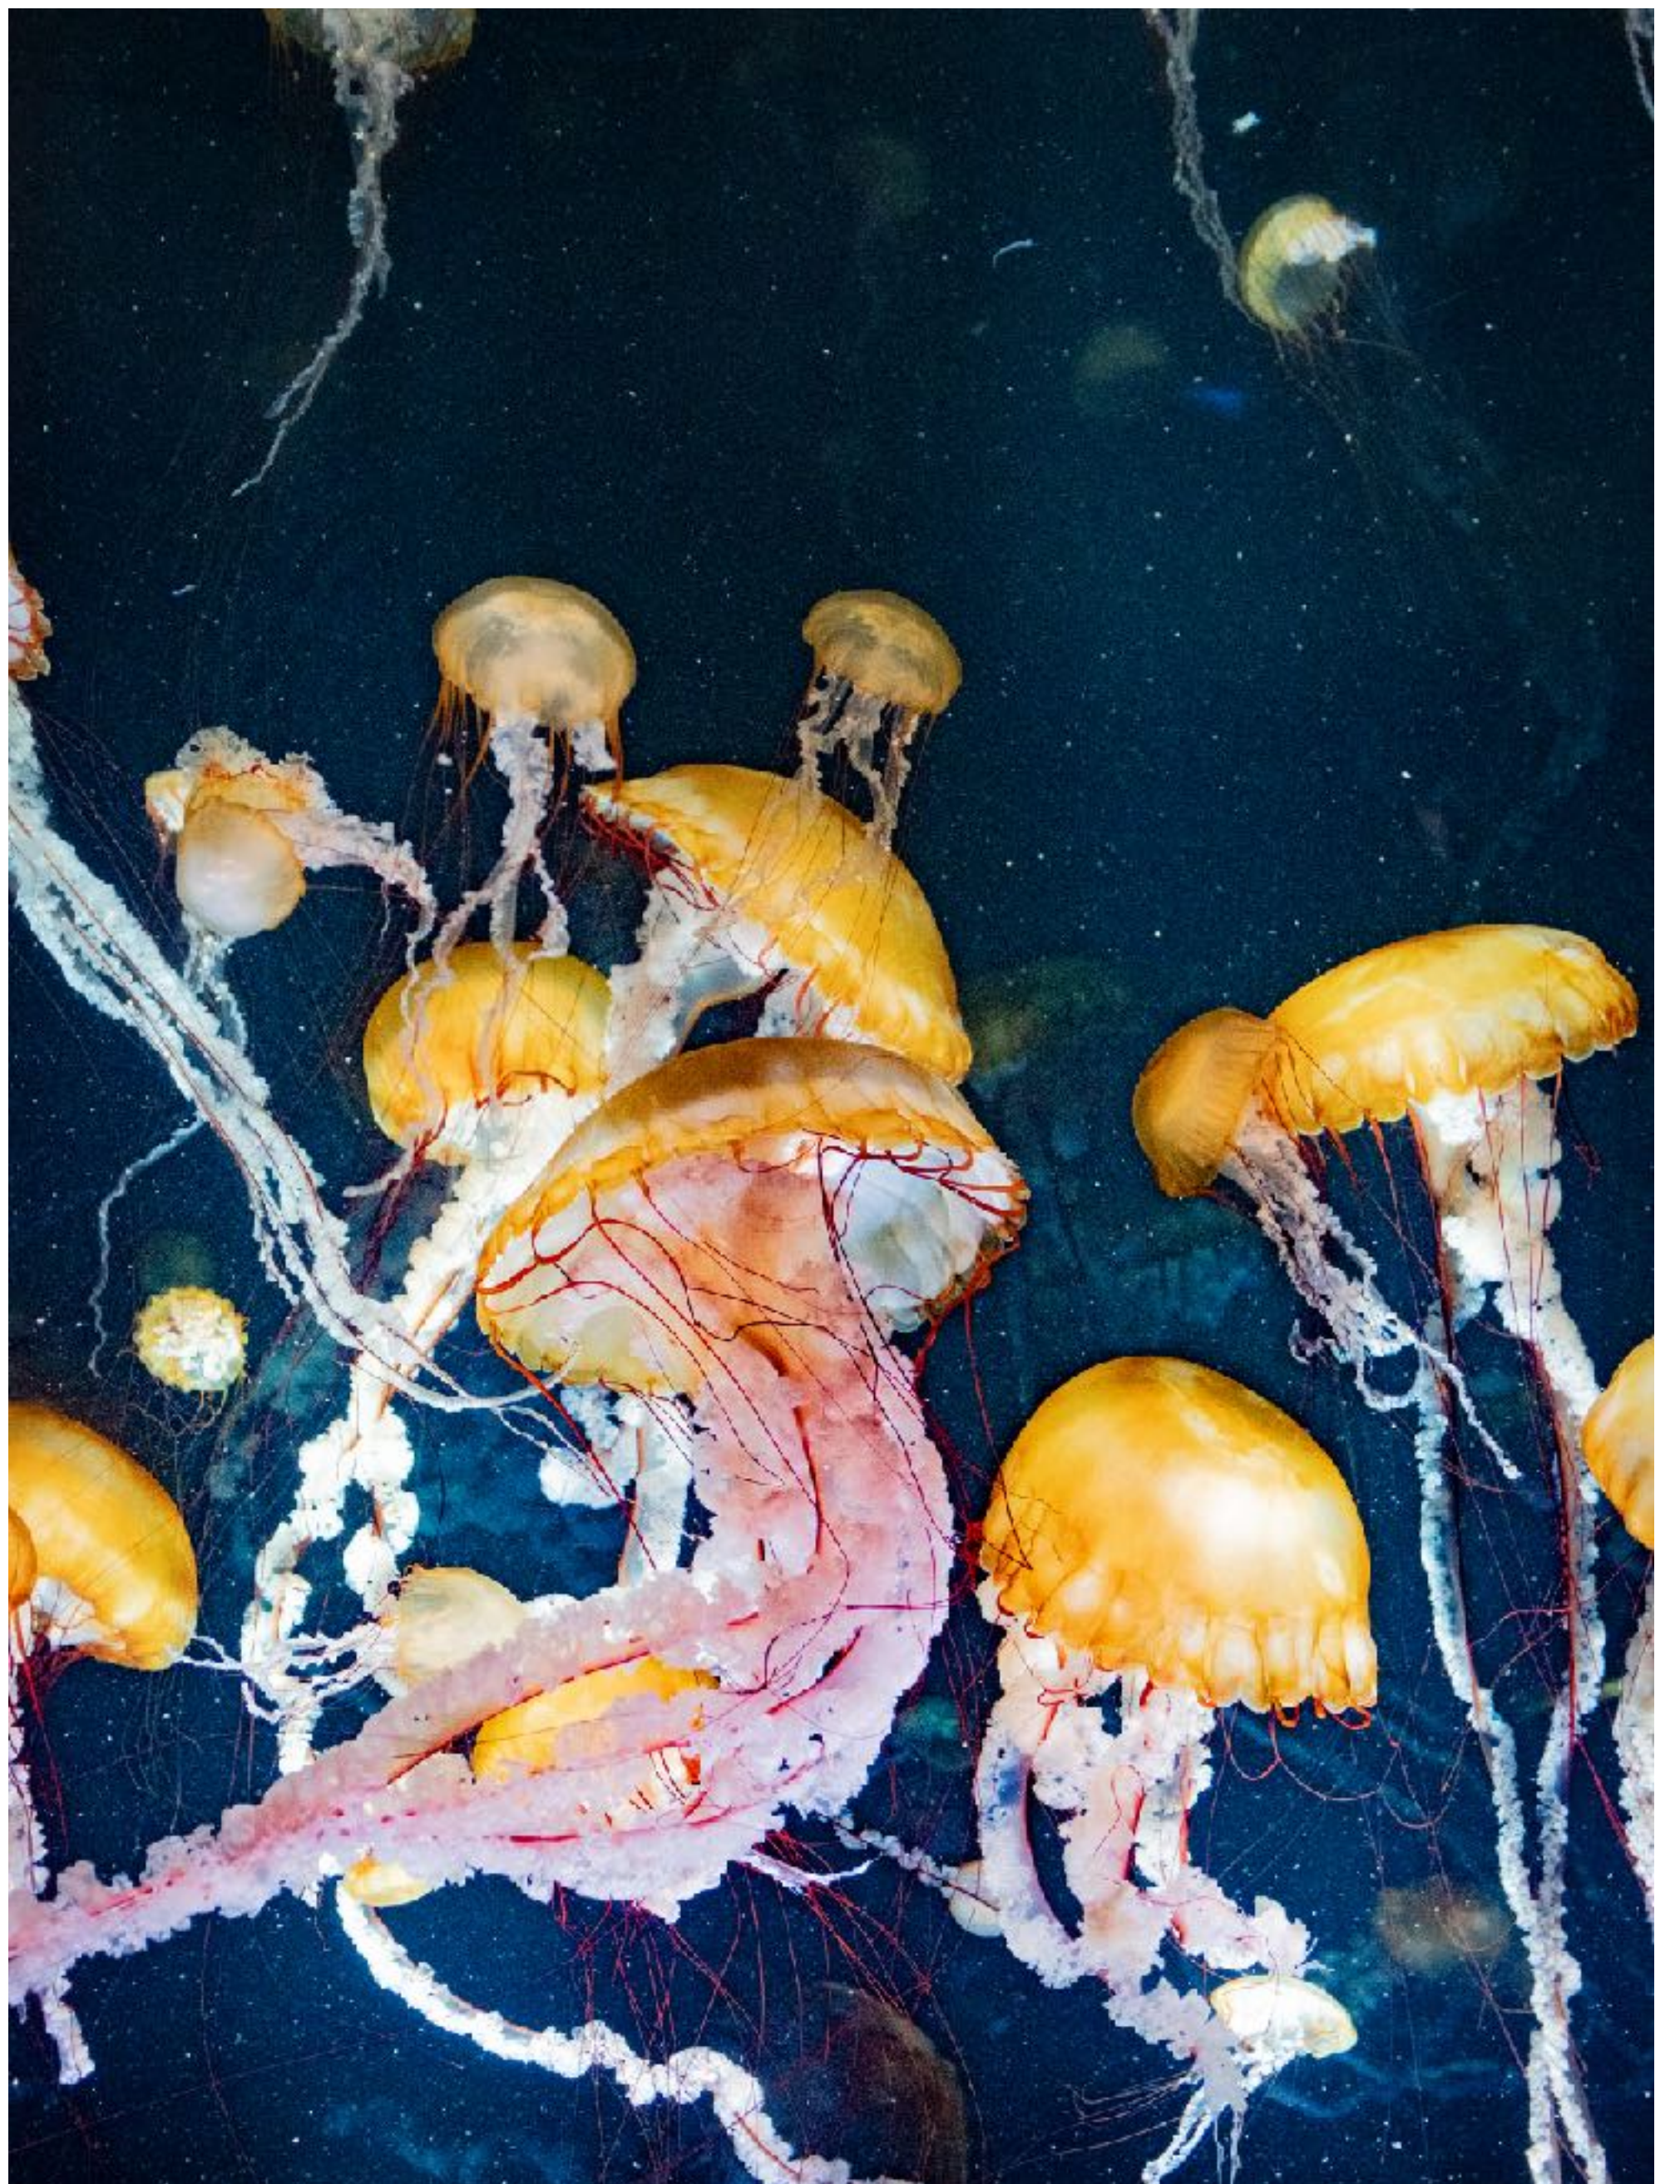

As seen on the left, these 3 posts are shown in the feed based on their dates.

Expanded view

On clicking a thumbnail on the calendar, expand the page to a detailed view of that card

Box jellyfish

Jellyfish have no brain, heart, bones or eyes. They are made up of a smooth, bag-like body and tentacles armed with tiny, stinging cells.

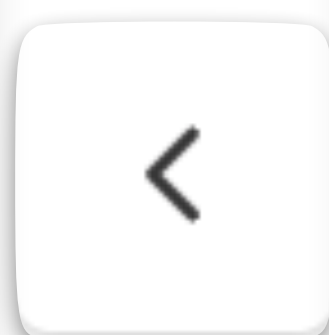

Scrollable view - within expanded view

When a user is in expanded view in the calendar tab, by swiping left or right, he should be taken to the next/previous card

API endpoint

GET <https://gorest.co.in/public-api/users/1858/posts>

Response body

```
{  
  
  "id": unique identifier,  
  
  "user_id": ignore,  
  
  "title": Link of image to be displayed,  
  
  "body": Text block  
}
```

Feel free to use any resources from the web

Although, we do recommend a few tools/libraries that could be useful:-

1. For having multiple images in your card ([Link](#))
2. Tailwind [CSS Framework] ([Link](#)) + Styled components for the same ([Link](#))
3. Framer Motion (for animations) - ([Link](#))

In case of any queries, doubts, etc, feel free to reach out to **Mohit** at **888-298-7393** either by call or WhatsApp.

We'll be more than happy to assist you.

You can submit your assignments at **careers@quinn.care**

(in case you couldn't complete all parts of the assignment, we still recommend you to submit)
